

Where state, county, and/or MCD/CCD boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

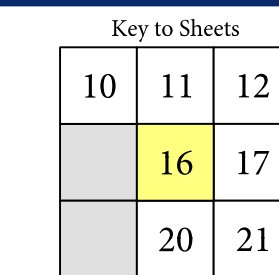

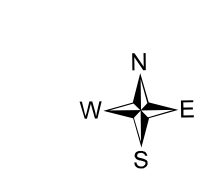

- 1 A " " following an MCD name denotes a false MCD. A " " following a place name indicates that a false MCD exists with the same name and FIPS code as the place; the false MCD label is not shown.
- 2 Place label color correlates to the place fill color.

The figure consists of two maps. The left map, titled "Location of County within State", shows the outline of the state of Maryland with its county boundaries. A small orange-shaded area in the southern part of the state represents the county of interest. The right map, titled "Sheet Location within Entity", shows a larger yellow-shaded area representing the entity. A smaller yellow-shaded rectangle within this area represents the specific sheet location.

Projection: Albers Equal Area Conic  
 Datum: NAD 83  
 Spheroid: GRS 80  
 1st Standard Parallel: 38 11 33  
 2nd Standard Parallel: 39 24 60  
 Central Meridian: -77 14 14  
 Latitude of Projection's Origin: 37 53 11  
 False Easting: 0  
 False Northing: 0

The plotted map scale is 1:13000
